CONTENTS OF *AQUATIC BOTANY*, VOLUME 34

VOL. 34 NOS. 1–3 JULY 1989

SPECIAL ISSUE. Photosynthesis and photorespiration in aquatic plants

1. Foreword

G. Bowes (Gainesville, FL, U.S.A.) 1

2. General Features of Aquatic Photosynthesis

Environmental variables and their effect on photosynthesis of aquatic plant communities
K. Sand-Jensen (Hillerød, Denmark) 5

Photosynthetic strategies and productivity in aquatic systems
H.L. Boston, M.S. Adams and J.D. Madsen (Madison, WI, U.S.A.) 27

Bicarbonate utilization function and mechanism
H.B.A. Prins and J.T.M. Elzenga (Haren Gn, The Netherlands) 59

The function of carbonic anhydrase in aquatic photosynthesis
M. Tsuzuki and S. Miyachi (Tokyo, Japan) 85

3. Photosynthesis and Photorespiration in Marine Organisms

Photosynthesis and photorespiration in marine phytoplankton
J. Beardall (Bundoora, Vic., Australia) 105

Photosynthesis, photorespiration and ecophysiological interactions in marine macroalgae
J.B. Reiskind and G. Bowes (Gainesville, FL, U.S.A.) and S. Beer (Tel Aviv, Israel) 131

Photosynthesis and photorespiration of marine angiosperms
S. Beer (Tel Aviv, Israel) 153

Photosynthesis of salt marsh species
B.G. Drake (Edgewater, MD, U.S.A.) 167

4. Photosynthesis and Photorespiration in Freshwater Organisms

Photosynthesis and photorespiration in freshwater green algae
M.H. Spalding (Ames, IA, U.S.A.) 181

Photosynthetic carbon assimilation and the suppression of photorespiration in the cyanobacteria
B. Colman (Toronto, Ont, Canada) 211

Plasticity in the photosynthetic carbon metabolism of submersed aquatic macrophytes
G. Bowes (Gainesville, FL, U.S.A.) and M.E. Salvucci (Lexington, KY, U.S.A.) 232

Photosynthesis and photorespiration in freshwater organisms: amphibious plants
S.C. Maberly and D.H.N. Spence (Fife, Gt. Britain) 267

Photosynthesis and photorespiration in freshwater emergent and floating plants
D.J. Longstreth (Baton Rouge, LA, U.S.A.) 287

VOL. 34 NO. 4 AUGUST 1989

Response of a freshwater marsh plant community to increased salinity and increased water level
K.L. McKee and I.A. Mendelssohn (Baton Rouge, LA, U.S.A.) 301

Notes on *Archaeozostera* in relation to the Zosteraceae

J. Kuo (Nedlands, Australia), K. Seto, T. Nasu (Osaka, Japan), H. Iizumi (Iwate, Japan) and K. Aioi (Tokyo, Japan) 317
Patterns of carbon isotopic variability in eelgrass, *Zostera marina* L., from Izembek Lagoon, Alaska
L.W. Cooper (Fairbanks, AK, U.S.A.) 329
Above-ground biomass variation in *Carex rostrata* Stokes in two contrasting habitats in central Sweden
A.B.C. Hultgren (Uppsala, Sweden) 341
Growth in length of *Carex rostrata* Stokes shoots in relation to water level
A.B.C. Hultgren (Uppsala, Sweden) 353
Water temperature and freshwater macrophyte distribution
E. Pip (Winnipeg. Man., Canada) 367
An annual cycle of flowering, fruiting and seed reserve for *Halophila decipiens* Ostenfeld (Hydrocharitaceae) in Panama
C. McMillan and K. Soong (Austin, TX, U.S.A.) 375

Short Communications

Pollination efficiency of *Potamogeton pectinatus* L.
Y.-H. Guo and C.D.K. Cook (Zurich, Switzerland) 381
Veronica anagallis-aquatica L., a potential source of leaf protein
V.N. Pandey and A.K. Srivastava (Gorakhpur, India) 385

Announcement 389
